Article published on June 6th 2012 | Business

The healthcare industry in India is showing great progress. The number of hospitals and nursing homes in the country is continuously increasing and this is resulting in a growing demand for various kinds of medical equipments ranging from simple instruments to the more sophisticated devices and equipments that work on complex mechanisms. Moreover, the increasing requirement of healthcare facilities on account of the changing demographics and increasing lifestyle is fuelling growth in the healthcare sector. While most of the simple instruments are manufactured indigenously, there is a high presence of MNCs when it comes to complex and sophisticated devices. The market for cath labs is showing the same trend and a significant share of the market is occupied by a few major foreign companies. The growing target base of consumers is expected to boost sales and the market is expected to exhibit steady growth in future.http://www.bharatbook.com/market-research-reports/healthcare-market-research-report/catheterization-laboratory-market-in-india-2012.html

The report begins with an introduction section which provides a brief description of cath labs and their uses. It also mentions the various parts of a cath lab. The market overview section provides an insight into the market and highlights the market size and growth both in terms of value and volume. It also includes the current and expected total installed base of cath labs in the country. Segment-wise market size and growth, both value-wise and volume-wise have also been provided.

This is followed by an analysis of the drivers leading to growth in the market. This includes increasing cardiovascular diseases, improving technology, improving hospital infrastructure, changing demographic structure, growing medical tourism and increasing healthcare spending. The key challenges faced by the market include improvements in other diagnostic modes and high costs and non feasibility in rural areas. Significant advancements are taking place in the market on the technology front and these have been included in the next section. These trends include rotational angiography, swing lab, 3D rotational angiography, biplane, stent boost, hybrid cath lab / OR, digital subtraction angiography, remote magnetic navigation and robotic-operated systems.
