Article published on July 3rd 2012 | Business

Buy e cigarette and get rid of smoking. Surprised? Well, these are no regular cigarettes that people smoke. These cigarettes donâ€™t cause lung cancer. Then what are these products? These are electronic cigarettes that help in eliminating the smoking habit. E-cigarettes contain liquid nicotine. When a user puffs, the liquid nicotine transforms into smoke and releases through the air. The cigarette tip contains an orange colored LED light. This glows while a user smokes the cigarette. It feels like burning of an actual cigarette.

There are several benefits of puffing e cigarettes. Have a look at them below:

Switching from normal cigarettes to electronic ones help in improving the health. It reduces carbon footprint. Filter is one of the most harmful portions in a normal cigarette. Through the filter sponge situated at the rear end of normal cigarettes, a lot of trash and litter enters the body of smoker. When someone smokes e-cigars, less amount of litter enters the lungs. There are no disposable filter butts and therefore, e cigarettes reduce the harmful effect of smoking.

If calculated properly, then e-cigarettes are less costly when compared to normal cigarettes. The investment is one time in case of electronic ones. The cartridge present inside the e-cigars can be refilled easily at low cost. But, normal cigarettes have become extremely expensive. A pack of 20 costs around 100 INR these days.

Also, the E-cigars are safer to use. They help in keeping the environment clean and green. Smoke emitting from these devices does not cause any harm to people present close by.

Where to buy electronic cigarettes?

They have become very popular these days. They are available in shopping malls and departmental stores. But it is always better to buy e cigarette from the internet. Through online shopping, there are chances of getting good discounts on the best products.
