Electronic cigarette reviews by Eliot Allen

Article published on November 30th 2011 | Business

Electronic Cigarettes are an alternative to tobacco smoking. They are a new way of smoking and a way of smoking that has caught on across the world with great success. The electronic cigarette offers the smoker an authentic smoking experience that is the next best thing, if not better, to the traditional cigarette. The electronic cigarette gives the smoker the feeling and taste of smoking by inhaling its vapor as they comfortably hold the authentic appearing cigarette. Inside the electrical cigarette lies an extremely clever piece of equipment called an atomizer. It is here that the cartridge gets heated up, warming the liquid and creates a vapor, which travels in and around the cigarette, just like a normal cigarette. This allows the user to recreate the sensation of real smoke.

Another great advantage of the electronic cigarette is that it is legal to smoke almost anywhere. This is because the electronic cigarette is not in the same category as a normal cigarette.

When the electronic cigarette is being smoked, the tip of the cigarette will light up, indicating that the atomizer is in sufficient working order. This light up tip also shows whether or not your cigarette needs to be charged. The process of charging your cigarette is also very easy. The electronic cigarette comes with an electric charger that plugs into an electric outlet where the cigarette is then attached an recharged. There is also a light which will indicate when your cigarette is fully charged and ready to be used again.

In regards to changing the filter, the smoker will be aware that the filter needs to be replaced, as the vapor will become less and less, and this is when it will need to be replaced.

Choosing this alternative way to smoke, definitely has its advantages, including the savings to the pocket book. Traditional cigarette smoking is expensive. The electronic cigarette is very cost efficient. In fact, it will cost a one-time price for the actual device, and then all that needs to be purchased is the filters to refill the cigarette, which contain as many as 60 cigarettes.

The craze for the smokeless cigarette has been phenomenal. Aside from the benefit of the authentic smoking experience and its cost efficiency, the smoker can also say goodbye to smoker's breath, smelly clothes, the lingering of smoke in the home and car, and the social stigma attached to cigarette smoking. Smokers waste less, do not have to deal with cigarette ash, there's no fire or flame, it is non-intrusive and the smoker can smoke almost anywhere.

The electronic cigarette is being used as an aid to quit smoking and to cut down on smoking. For the smoker that cannot let go of their dear old friend, the smokeless cigarette is a wonderful alternative to smoking tobacco. Not to mention, it is very simple to purchase and does give the smoker all the advantages of smoking plus a few extras, such as the reduction in the cost of smoking.
