Availability of Car Leasing Service Providers

by Freddie Wade

Article published on May 11th 2012 | Finance

There is a growing need for car leasing on most vehicles as many consumers struggle with their finances stemmed from a fluctuating economy.

But for many consumers, a car is a great necessity in todayâ€™s lifestyle; hence, the best car leasing firm or contract hire is desired.

Service Providers

There are many car leasing service providers in the market that can provide the right car leasing or contract hire services to the consumers or businesses. These can be professional car leasing service providers with a good reputation and strong establishment in the leasing and motor industry.

Offerings

A contract hire or car lease offers consumers a fixed-cost motoring; this means that the consumer knows exactly what is required to be paid and when to pay it. This is excellent for the consumerâ€™s budgeting. This is one of the reasons for the popularity of contract hires.

A car lease by VAT-registered companies offers these companies as much as 50% tax rebates from the total payments servicing the car lease with 100% maintenance costs. This gives great savings to the company.

The consumer can enjoy the full use of the car until the contract ends; after which the leased car must be returned to the hirer. Most companies are happy with such arrangement as there is no need to maintain older cars; companies prefer to procure new cars to service their business operations while maintaining their business image.

It is the private consumer who may wish to buy off the leased car from the hirer as it can be quite costly to lease another car. Moreover, if the consumer has maintained the leased car well over the couple of years of leasing, the leased car is considered to be still in good condition with another 3-5 years of good mileage available.

Contract Suitability

Car leasing service providers are abundant in the market to assist any consumer with car leasing schemes. The consumer would need to identify their personal motoring habits to determine the best car leasing scheme to be undertaken.

A high traveling agenda would incur a high mileage; this would impact the carâ€™s depreciation and monthly payments on the car leasing contract. If the stipulated mileage limit is exceeded, there would be extra charges.

But a fixed monthly cost and having a new car every few years would be ideal factors to consider contract hires. Businesses love car leasing schemes as they are able to update their company fleets regularly, avoid lump sum down payments to control their cash flow and adjust their company fleet according to business performance and staff numbers.
