Get an Edge with the IBM Typewriter by [Chris Adam](#)

Article published on March 19th 2012 | [Advertising](#)

Since 1829 when America's first typewriter was patented, the typewriter has evolved tremendously. Typewriters are important for writers, for office work, for large enterprises; and all such people who write or type on a regular basis. In the past, they were looked upon as the most important office equipment. The earliest machines were the manual typewriters which were then slowly replaced in most places by their electric counterparts. The demand for used manual typewriters has diminished over the years though people still buy them in the second hand market to be cherished as collectibles. Modern companies now employ the ibm typewriter IBM typewriter to carry out complex tasks in less time.

In fact, it is the IBM Selectric typewriter that has now acquired an important place in work settings worldwide. IBM is regarded as the hallmark for quality and innovation and when it comes up with a new product, people are always eager to try it. The iconic IBM Selectric has dominated office and corporate environment like no other. It is fast, dependable, efficient, and quiet which makes it a great option for every office. The agile machine can do every task in least amount of time without affecting the quality of work. It's compact and elegant so that you can keep it anywhere you want without having to do much space management.

Easy availability of spare parts is another reason why it makes sense to invest in an IBM Selectric typewriter. The name IBM holds a lot of promise and those associated with the brand are aware of the quality and comfort it brings along. The smart machine minimizes your errors, enhances your typing speed, and gives you typing performance you have never known. Go for an ibm selectric IBM typewriter to feel the sheer luxury of typing for hours without feeling the agony of aching fingers and straining eyes.
