Self Expression and Making a Fashion Statement with Funny Tees

by Kiran

Article published on June 29th 2012 | Advertising

Self-expression is the ultimate variety of a statement fashion and there are not many options as effective as funny slogans and designs on t-shirts, in this regards. There is a sheer variety of options available to choose from. You can also develop your own creative idea to create something unique and a testament to your personality. Bringing these concepts to head are the various shops and brands that allow for such printing and designing services. Here is a look at the variety of different prospects that you can enjoy and create your funny tees.

Bring a cartoon to life

Cartoons are the extremely popular as funny icons on your t-shirts. They make it enjoyable for both adults and children. What you can do is endure that the color of the cartoon should be offset by the color of the plain t-shirts. The idea is to make them pop. The icon can be placed in any size you want, although most people prefer cheery colors and blown up images to be placed prominently on the t-shits. You might also think of adding some small comment or trademark catch phrase of that particular cartoon character right beneath the image.

Graphic funny tees

While cartoons are graphic too, the graphic tees can incorporate a broader selection of images and artistic expressions that bring some comic relief. The introduction of sounds through images or even a fascinating comic fight translated in to a t-shirt print, is bound to make even the staunchest of the people smile when they see it the idea is to recreate scenes and situations through the art. There should be a comic element in it; you might also consider caricatures of famous artists and politicians as a part of your funny statement.

Cute and fun messages

The best part about funny tees is that they are invariably popular with both male and female populace. However, with females the comic factor tends to be directed towards the cuter variety. There are certain messages that are more popular for female t-shirts than males. However, there are again some images and slogans that might be extremely funny on a male t-shirt but not so much for the females. The idea is to prevaricate and judge the best element that works with your inclinations.

Clever comedy sells

There is something to be said for comedy t-shirts that have a bit of a sensible or straight humor to them. These t-shirts might spin on some words or expressions to provide a sarcastic humor or a knowledgeable humor. There is no limit to how much college goers attest by such t-shirts. The humor here actually comes at the price of being aware about certain aspects of the news or politics. There are many t-shirts, which also play on the comic aspect of science or the geeky knowledge of some subjects. Crass jokes are never widely popular. Although many people will give a moment to laugh at the joke, not many will come up to wear the t-shirts to their work or colleges.
