Snug as a Bug by [James Blee](#)

Article published on August 3rd 2012 | [Advertising](#)

When it comes to nocturnal comfort, there's nothing quite like ladies cotton nightwear. Ladies cotton nightwear does not contain any chemicals or allergens so is naturally hypoallergenic and won't irritate even the most sensitive of skin. Ladies cotton nightwear is extremely soft against the skin which is why it remains so popularly used in a range of sleepwear items. However, cotton is also a superb conductor of heat, so it draws heat away from your skin to keep you cool and dry simultaneously. Ladies cotton nightwear may not be a living entity but incredibly, it does breathe to provide ventilation.

There are two main type of ladies cotton nightwear: knit and woven. Knit ladies cotton nightwear is stretchy because of the loops in the fabric (loops that obviously remain invisible to the naked eye) whereas woven ladies cotton nightwear does not stretch because their fibres run at 45- degree angles to one- another to keep their shape for a longer duration. Nevertheless, both forms of ladies cotton nightwear perform to the same high calibre and promise to keep their inhabitants cool and dry the whole night through.

Whether you want to reside in a snug and cosy in an "incubator" of heat or as cool as a cucumber in your passion hammock, your choice of sleepwear is clear: ladies cotton nightwear is for you!

If you are looking for fashionable, fun and functional ladies cotton nightwear; ladies cotton nightwear that is so stylish that you could pop to the local Tesco store in without anyone taking a second glance in the cream cakes aisle or indeed, ladies cotton nightwear that you can easily afford to splash out on today, then look no further than Cyber Jammies; the ladies cotton nightwear company of your dreams.
