An experience of repeating numbers I'd like to share with you.

On a lunch date with a friend a while ago a $5 note â€˜blew' onto my foot. A week later, out with the same friend this happened again (she was happy to receive a free sandwich from me!) A couple of weeks later I helped out with a magic show; at the end I could choose two envelopes â€“unknowingly I chose the one with a $5 note inside (the other being a mint). At this point I was thinking it could be coincidence and was happily getting rich with $5 notes.

Only a few days later I was walking my dog and took him in a direction I wouldn't normally go â€“ on the ground with no one around was a pile of $5 notes! I looked about and there wasn't a soul so I collected them and pocketed close to $100 in only $5 denominations. I was now moving past any thoughts of coincidence.

This prompted me to revisit some of my old numerology books where I came across pinnacles, which are individual for each person and calculated by your birth date. I'd read about pinnacles before but not in-depth. I realised I was about to move into a 5 pinnacle which would carry me through the next 18 years.

The 5 is open both front and back and brings with it the energy of being open to new experiences. The 5 pinnacle brings freedom from restrictions, change and is a turning point in life. With focus it gives you the opportunity to really do what you want to accomplish your dreams. I feel the numbers guided me somehow and my 5 pinnacle could not be more accurate. Light Stays Retreats and Living speaks for itself!

On another note I often see repeating 11:11, which is a master vibration number. It can surface when sending an email, looking at the clock or my computer. It means you're on your right path and a good time to affirm what you'd like to manifest in your life in the present tense. For example if you'd like better health say, "I have perfect health and all is well".

As Deepak Chopra states "Nothing is random or by chance".

Do you have numbers replicating in your life? Please share your story with us..
