Article published on May 3rd 2012 | Writing

Irritated by the blazing heat of the sun whenever you drive around town? Do you get soaked with rain everytime you go for an errand during rainy season? There's an easy solution to your problemâ€¦ get a jeep top! It makes the ride more fun and comfortable and at the same time shields you from the heavy rains and the scorching heat of the sun.

Now the question isâ€¦ would you rather go for a hard top or a soft top? Hard tops are created of heavy duty, durable materials that may withstand even harsh weather conditions. Hard tops also comes with features that are important especially when travelling. These important features are the defrosters which allows you to have the best view when driving on a foggy weather and dome light which allows others to see your jeep even at night. Soft tops, however, are made of light materials are can be torn easily. Soft tops normally do not have special features because attaching wires to it is difficult. You can decide to get a soft top or a hard top but it all depends on your preference.

Even if jeep tops are considered jeep accessories, there are still other things you can add to your jeep top to further accessorize it. Some of these accessories include desk covers that keeps your cargo protected while maintaining the aerodynamics of your jeep; the windscreens which are attached to the windows to allow air to freely move around while protecting the driver and passengers from flying debris; changeable windows; sound bars which lets you enjoy music while on the road and trail covers which keeps your vehicle dry even on a rainy weather.

Jeep tops and its accessories can be found in the market today with various designs, materials, brands and colors. It is up to you to choose the jeep top which you think would perfectly fit your needs, plus your budget. Plus! If for some reason you would want to experience fresh air or would wish to get more adventurous, there are jeep tops that you can easily uninstall.
