Article published on April 12th 2012 | Health

To fully enjoy e-cigarettes, when you purchase the kit, you should also purchase three must-have accessories. The accessories ensure that you always have a charged e-cigarette so that you donâ€™t have to buy a pack of regular cigarettes. The e-cigarette has a white LED light so that people can see that it is an electronic cigarette. It creates a vapor, instead of smoke. It uses an atomizer that creates vapor that you can inhale and exhale. The cartridges contain a nicotine gel so you can cure that â€œnic fitâ€• where ever you might be.

Rechargeable Battery

The batteries for an e-cigarette last about six months. Since batteries donâ€™t have unlimited power, youâ€™ll have to recharge the battery. It takes about two hours to recharge the battery. So you wonâ€™t b tempted to smoke regular cigarettes while youâ€™re charging the battery in your e-cigarette, purchase an extra rechargeable battery. While you are charging the first battery, you can use the rechargeable battery to enjoy electronic cigarettes. Switch on and off, and you have a yearâ€™s worth of battery. The rechargeable battery also comes with a free tobacco nicotine cartridge.

Car Charger

Many people like to enjoy electronic cigarettes in the car. Now you can smoke in the car when you are on a long trip without worrying about running out of battery juice. The car charger fits standard car outlets. It simply plugs in to charge the batteries. Once the battery is fully charged, the full charge indicator light will light up.

Nicotine Refill Cartridges â€“ Tobacco or Menthol

You will need some nicotine refill cartridges. The cartridges come in tobacco or menthol. You can choose a pack of 14 or a pack of 28 cartridges. A refill cartridge stays fresh for 24 months as long as they are not opened. Once they are opened, a refill cartridge will stay fresh for more than two weeks. Each refill is equal to 25 traditional cigarettes. The liquid contains 1.6 percent nicotine by volume, which is equal to 6.4 mg of nicotine for each refill.

You can enjoy e-cigarettes anywhere you want, even in places that donâ€™t allow smoking. The e-cigarette looks and feels like a traditional cigarette, but produces no smoke, so you can smoke it in bars, restaurants, sporting events and even inside your own home. They are a great alternative to smoking traditional cigarettes and donâ€™t bring the â€œsocial disgraceâ€• and legal consequences of smoking traditional cigarettes. Smoking electronic cigarettes also saves you money.
