Article published on March 16th 2012 | Health

Now, that we have actually, hit the word Plastic surgery. Let us know, if there is at all, any difference between a plastic surgeon and a cosmetic surgeon. I believe there must be, otherwise, why the same profession has got two different names? With the increasing popularity of the aesthetic surgery, patients often find themselves encountering, with terms like plastic surgery, aesthetic plastic surgery, Cosmetic plastic surgery, or even a plastic and reconstructive surgeon. But, never the less, there is a difference between a plastic surgeon and a cosmetic surgeon. The difference is, in their qualification.

Plastic surgery Bonita Springs says on acquiring a medical degree, the doctor stars the intense practical practice on his / her speciality subject, where comes the vast difference in the degree of their standard of the certificate awarded. Plastic surgery, like any other surgery carries much risk and the surgeries, under this category, must be treated with utmost seriousness. Choosing the right surgeon is the single most important decision a patient, considering plastic surgery will make.

According to the Plastic surgery Bonita Springs, the primary difference between the two surgeons is the training that they undergo. To become a plastic surgeon and use the title of a â€œplastic surgeonâ€•, doctor must be fully licensed not only, in the practical field, but also, should be able to talk medicine of the same field. He or she must undergo, at least five to six years of formal training programme, in plastic and reconstructive surgery. Out of which, the first three years is dedicated to general surgery, and the next three to the plastic surgery residency. Thus, the doctors who have completed, all the last 6 years in the operation table can right, fully claim to be plastic surgeons.

Hence, we can understand and note that a plastic surgeon does not reconstruct, but, actually construct, rectify and correct the deformed and any physical abnormality, which may be by birth or caused by any fatal mishap. A fully trained Plastic Surgeon, thus, can use the title like Plastic and reconstructive surgeon, cosmetic plastic surgeon and facial & aesthetic plastic surgeon.

On the other hand, the house of Plastic surgery Bonita Springs say that a cosmetic surgeon is a doctor who perform surgery, meant for minor reconstruction. These doctors carry varying credentials, which may be a diploma or just a certificate course, acquired. That means they actually, have not gone thorough the formal training in surgery, and from the ethical point of view, the house of Plastic surgery Bonita Springs do not award, the title of plastic surgeon to any aesthetic surgeons.

The Azul Cosmetic Surgery and Medical Spa, by Dr. Patrick M. Flaherty (an ophthalmologist specialized in facial cosmetic surgery) as said earlier, is in both surgical and also, in non surgical treatments. Azul beauty house is known for their latest technique, in surgical and non surgical section, too. Azulbeauty helps in smoother and more pleasing contour of the face and the neck. Many patients have been benefited, by their service and are extremely happy, with their result and they themselves, recommend time and again, â€œthe best option to diminish your ageâ€•
