Dependable Chevrolet Trucks for Ontario Residents by Clorinda Disimone

Article published on March 21st 2012 | Auto

Chevrolet is a brand produced by General Motors one of the Big 3 automakers in the United States. Chevy has a whole range of products designed for customers who prefer power and durability in their vehicles. Thereâ€™s the hatchback, the pickup truck and the van. The prices of Chevy vehicles are among the most reasonable in the market.

The Chevrolet Motor Car Company was formed on November 3, 1911 by Swiss racecar driver Louis Chevrolet and William C. Durant. Seven years later, GM acquired Chevy. Alfred Sloan, the president, chairman and CEO of GM during the 1920s, positioned Chevy to compete with another known brand, eventually outselling the latter in 1927 by one million units. Today, the Chevrolet has kept up with the changing tastes of car users. They have improved their small and medium sized cars and introduced the Volt hybrid sedan.

Chevrolet is also known for its durable and powerful pickup trucks. These include the Chevrolet Silverado 1500, Chevrolet Silverado 2500HD and the Chevrolet Silverado 3500HD. The HD in its model name means heavy duty to emphasize it remarkable towing and hauling power.

A pickup truck is a versatile vehicle. Its characteristic open top rear cargo area or commonly called a bed makes it useful for families who wish to transport large or heavy items. Pickup trucks are designed to be durable, and Chevy pickup trucks are no exception.

In busy highways like Highway 401 in Ontario, a vehicle should be able to withstand long trips. Customers who are more interested in the function rather than the form of their vehicles will find the Chevrolet 1500 useful for transporting supplies for home improvement and for towing boats. The Chevrolet 1500 also has a flashier version, with attention-grabbing wheel designs and bucket seats. For those with a tight budget, there are dealers of Chevrolet 1500 Ontario residents can visit for their used Chevy pickup trucks.

For many pickup trucks, the cabin is usually a concern. The Silverado line of pickup trucks including the Chevrolet 2500HD has improved its cabin while keeping its durability, hauling and towing capabilities intact. Dealers of Chevrolet pickup trucks in Ontario have various models of Chevrolet 2500 HD Ontario buyers can choose from.

Many dealers of Chevrolet 3500HD Ontario pickup enthusiasts can go to offer good deals for Chevy pickup trucks. You can discuss with them your requirements so they can recommend the best model for you. The Chevrolet 3500HD model can perform truly heavy duty towing and hauling which you can find appropriate for your need. For more information on Chevy pickup trucks, read ehow.com.
