Efficient and Environment-Friendly Rides for Spring and Summer

by Junior Perrera

Article published on June 14th 2012 | Auto

If you are in search of a new car or a replacement, now is the best time to get one. There are plenty of choices you can take on a vacation. Some of these are good to take for travel practically anywhere.

Sedans and hatchbacks are practical; and you can take them anywhere without drawing too much attention. These are the cars you can take to school or work, and can drive in the city, in suburban areas, or the country. Sedans and hatchbacks can vary in size, and the features they have can vary, too. Some sedans and hatchbacks have rear-wheel or four-wheel drive systems, which are useful for driving in unpaved terrain.

Some coupÃ©s are equipped with rear-wheel or four-wheel drive. Despite their delicate appearance, coupÃ©s tend to be as sturdy as they are impressive in their performance. CoupÃ©s are great for driving alone or with cherished company.

However, vans are great if you frequently travel with a large group like your family or a lot of friends. Panel vans are good for this because these can carry all of your belongings with enough interior room for you to move in. Modern panel vans have a back row of seats where your family or friends can safely ride in. Passenger vans maximize passenger space and are great if you have heavy luggage.

Sport utility vehicles that a Ford Edmonton dealership can carry have the same advantages as panel vans. The sideway-facing passenger seats may be folded to make way for more payload, and the front-facing passenger seats in the second row have plenty of leg room and head room. If you need to maximize passenger capacity, a sport utility vehicle has enough room for as many as ten people.

Pickup trucks do not have as much passenger space, but offer plenty of luggage or cargo space, particularly if the cargo includes large or heavy materials. This is useful for artists bringing their easels, tripods, or any other equipment apart from their personal belongings. A truck that Ford in Edmonton dealerships have vary in style and size; so consult your dealer for what suits you.

A Ford Edmonton dealership might carry hybrid vehicles. These vehicles have an electric motor/generator and a conventional gasoline engine. Hybrid vehicles tend to be expensive but are fuel-efficient and convenient in the long run because of their ability to reduced wasted energy in stop and go driving. Some compact cars, sedans, and sport utility vehicles have hybrid systems. For more information, see Ford.com.
