How to Convert MTS Video to Other Popular Formats by Adonica John

Article published on November 28th 2011 | Software

Capturing scenic beauties while on a tour to hill station or taking lively pictures of the birthday bash at home indeed gives you ultimate pleasure and the sophisticated camcorders from Sony or Panasonic help you to accomplish such a purpose with acute finesse. The files in these camcorders are saved in the MTS or M2TS extensions of the AVCHD format, which is used to store the motion pictures from high definition digital video camera recorder. Some of the video players are able to play these files while for all the other players, to run these MTS videos, you can use video converter.

With the help of MTS (MPEG transport stream) File converter, you can convert MTS video into varied other popularly used formats as the requirements of your media player. It hardly matters if your video player supports AVI, FLV, MPG, MP3, WMV, iPhone, iPod or any other format, the MTS video converter is perfectly capable to convert mts video any of these extensions or format. All you need is to download MediaConverter trial version from its official website and start using the same. Once you fell in love with it, you would definitely be tempted to buy the full version.

Simple and user friendly steps to convert MTS files

The MTS converter allows you to carry on with the conversion process by following merely few easy steps. If you are a newbie, you will feel at home using it.

Step 1Select the input MTS file

Launch the software and move to its right, you will see varied icons (such as Photo, Audio, Video, DVD) that enable you to select the input files from that particular type. Click â€œVideoâ€• icon and browse through the location of your MTS file to select it as the source file.

Step 2Move to video editing (optional)

If you want to do some customization before converting the MTS file into your preferred format, then you can click the icon to edit videos.

In the resultant video editor, you can change the settings such as color adjustment, denoise, speed and more of the current video so as to obtain it in the form you prefer.

Step 3Select the output source

On the right side of the workspace, you can click the button to choose the format in which you want to convert MTS file. Let us select the MPEG format.

Step 4Start the conversion

The final step is to start converting the MTS file into MPEG format. Click the â€œStartâ€• button to do the honors.

The progress bar next to the icon will show the conversion process in percentage. Along with the â€œUsed Timeâ€• and remaining time, just to assure transparency throughout the process.

The process to convert MTS file using the mts video converter is hence complete. You are free to relish the video in your craved format. Enjoy!Capturing scenic beauties while on a tour to hill station
