Article published on December 29th 2011 | Auto

BMW is among the most revered and competitive manufacturers in the automobile sector. There isn't any stop to the high increase in BMW sales each year. You'll find lots of used BMW for sale in Arizona that will be suited to you or your family members. BMW manufactures a number of designs that are a good fit for all kinds of households. Whether you'll need a glamour car that has the best technology options or maybe you want something easy to take your children to school, you will find an incredible variety.

Finding the Right BMW

However selecting the right BMW can be difficult as you may end up seeking a car which may be unacceptable to your everyday living. Even if you are looking for family cars or compact cars they have a wide variety available in each style. This is why it's really a difficult job selecting a used BMW that is certainly suitable for you. But when you get down to it, the best BMW models are definitely either from the BMW-1 series or the M3 GTS.

The GTS is a light-weight car with wonderful power with optional air conditioning. Also you have a 444 horsepower engine along with a maximum torque of 325 lb-ft at 3750rpm. The door trim as well as center console have been downsized to make it more compact. Without the ac the car weighs even less. Other functions comprise of fully adjustable suspension, improved speed (from 0-to-60-mph in 4.4 seconds), 190 mps top speed and even a seven-speed dual-clutch transmission. The price is around $170,000 for a new car.

Moreover the car models from the BMW M1 series also offer a lot of options and they will also be a good ideal selection for a lot of people. However the BMW M1 series is alot more aimed at young drivers and is more design and also performance oriented than other models. It's by far the most sporty vehicles that BMW is offering. Other functions include a sleek outline, flared wheel arches, 0-to-60 mph time in six seconds, top speed of 161.6 mph, 3.5 liter Inline-5 engine, highest torque of 243.4 lb-ft at 5500rpm and a manual five speed transmission. The cost is a bit high at $115,000 although you can buy used car models that are billed a lot less.

Buy Certified Pre-Owned BMW

In terms of buying used vehicles, buying certified pre-owned cars is definitely a good option. This is the same for when you must purchase a BMW. When you shop for certified pre-owned BMW you can get complete comfort as this certification signifies that the car comes checked and also repaired from the company which assures that there won't be any problems you need to think about plus that the car is in good shape. It is something which other used cars will not be able to offer you at all - most used cars could have a a lot of problems and moreover scams attached to them that you need to be cautious about when purchasing used BMW for sale in Arizona.
