Mobile Repair Services Function As Lifesavers by Angie Turner

Article published on June 8th 2012 | Auto

A mobile repair service is an on road automobile and truck repair service that assists people whose cars and trucks break down while they are on the move. Usually these services are provided within 45 to 60 minutes of the breakdown and these mobile service repairs are installed at various places near the highway sites. Most of these services are available 24/7 throughout the year. They have easy helpline numbers and the mechanics are professionals who have considerable experience and repair the broken vehicle at a high speed. The payment options provided by these mechanics are various and they accept checks as well as credit cards making it very convenient for the drivers.

The services provided by these mobile repair service include full service emergency repair and PM Service. They include repair of diesel and semi trucks, trailer repair, repair of the RV, construction equipment repair, on site hydraulic hose repair and replacement, mobile welding, tire change and repair and semi jump-starts.

They carry a wide variety of equipments and are experts in mechanical repair problems that occur. They include belts, chambers, Alternators, Starters, Turbo, Exhaust, Radiator, Jump-starts, Fuel leaks, Fuel filter, Seals, 5th wheels, Axles, Bearings, U Bolts, Lights and clutch problems.

Other services include tow services, which have the strength and capacity to tow tractors, trailers, box trucks, pull starts and load shifts. Retreads, recaps and new tires including super singles are also available in these cars vans and small trucks. Some of these service providers also provide the facility of emission testing and DOT inspections.

These on-road services are very popular on the highways all around the world especially in U.S. and are considered very helpful in the time of emergency. Their service is fast, efficient and has a wide range of comforts to offer. Due to competition, these services are cost efficient also and function as lifesavers.
