Paintless Dent Repair Cost is the Most Effective Solution There is by [Julia Bennet](#)

Article published on May 15th 2012 | [Auto](#)

When you are faced with a ding or a dent on your car because of some reasons, you just have two options to bank upon, either traditional body paint and repair or the paintless dent repair. Choosing the latter is a wise move so keep reading to know the best auto body repair shop locator and how to get the best paintless dent repair cost for your car.

Aforementioned methods have their own set of advantages and disadvantages but when you note the similarities and differences between them, paintless dent repairing will definitely be the better choice. For starters, the paintless dent repair cost is way lower than the cost of normal body painting for dent repairing. So the best thing to do when you are faced with a dent or a ding is to find an auto body repair shop locator to fix the dent or ding.

Another major advantage for paintless dent removal is the quality of it, beside the paintless dent repair cost; the quality is also very high, as the car will be able to look as good as new, there will be no indication of the dent what so ever. The fact that paintless dent repair doesn't use any kind of paint, so the car's outer paint will not be touched, thus there is no worries of having different kinds or colours of paints on the outer body of the car, thus it will look the same as it always looked. The paintless dent repair uses special tools and techniques in order to remove the dent or ding without hurting the body or using any kind of paint, on the other hand the traditional body shop will sand the damaged area, then the body shop will apply paint to the area, and no matter how much it tries to match the new paint with the original paint, it will never look the same. So far, the paintless dent repair cost is lower, and the quality is higher, so look for an auto body repair shop locator if you haven't started already.

Another benefit is the time, which is a very important factor these days. For example, you are going to work, someone dents your car, instead of going through the hardship of re painting it, and waiting for the area to be sanded before it can be repainted, then you will wait for the paint to dry, it's a long process. But paintless dent repair doesn't need that much time, as it doesn't sand or re-paint, this why it is the most convenient choice for the busy life we lead today.

This method was invented by Mercedes, as they always had problems with the transportation of their car from Germany to the U.S because of the dents and dings, so they invented this method to repair their cars. All of this would urge you to find an auto body repair shop locator as fast as you can.
