The Need to Inspect the CNG Cylinder of Your Compressed Natural Gas Vehicle by [Randy James](#)

Article published on June 29th 2012 | [Auto](#)

With the world switching to greener solutions for saving the environment, the demand for Compressed Natural Gas vehicles has significantly escalated in the recent years. Compressed Natural Gas vehicles are more eco-friendly and offer lower cost on fuel-consumptions in comparison to the gasoline driven vehicles. Hence, today more and more people are opting for Compressed Natural Gas vehicles. However, owning a Compressed Natural Gas automobile is not enough; you also need to periodically get it inspect by a professional CNG cylinder inspector. After all, the government agencies in most of the countries also require that.

While hiring a Compressed Natural Gas system inspector, you need to remember the following points to ensure a detail and proper inspection:

• The inspector must possess a minimum of 2 years experience in performing Compressed Natural Gas container inspections.

• He / she must also have thorough understanding of different varieties of containers employed in CNG vehicle systems and damage allowances for each variety.

• The inspector should also have proper knowledge of inspection requirements, procedures and tests, etc.

• Should have an authentic license for carrying out inspection of the Compressed Natural Gas automobile systems.

• Also make sure that the inspector has obtained a proper training for inspecting Compressed Natural Gas containers.

Now, the next relevant question that must be popping up in your mind is “where to get a good professional inspector for inspecting your CNG kits? Well, you can expect to get proficient Compressed Natural Gas inspection in certain local utilities in your city. Even certain Compressed Natural Gas vehicle and cylinder manufacturers also provide Compressed Natural Gas inspection services.

So what are you waiting for? Follow the above suggestion to hire an expertise CNG cylinder inspector to accurately inspect your Compressed Natural Gas automobile.
