Win every race with the Nissan 240sx by [Kyle Bates](#)

Article published on December 1st 2011 | [Auto](#)

It was the year 1988 when the entry of a spectacular two-door car took the whole North American automobile market by storm. And who else then Nissan could do the wonder of launching such a ground-braking sports coupe. So, this two-door car was launched by this celebrated brand, named as Nissan 240sx. The Nissan 240sx replaced the outgoing 200SX, its earlier model.

So, when the two-door compact Nissan 240SX was launched, it was nearly sure that this exquisite sports coupe will create history in the automobile industry. The basic in this car remained the same i.e. its engine. Since the beginning all the versions of the 240sx were fitted with the 2.4-liter inline 4 engine. This car stood above amongst its competitors as it was the only rear-drive car that utilized its rear-wheel instead of the front-wheel in order to provide extra comfort. To talk about its styling, it wasn't highly stylized but it still it managed to fascinate the imaginations of the matured drivers who weren't very pleased with body kits and power bulges. However, many ultra-modern body kits are available in the automobile industry to give this 240sx a gorgeous and deluxe appearance.

Yet another striking feature of the Nissan 240sx is its well-balanced weight distribution and sporty suspension tuning and that is because of its rear-drive layout. Simultaneously, the 2.4 liter engine in this coupe provides low-to-mid range torque that paves the right way to come out of the tight corners and easily drive in the slower traffic on any two-lane country road. In these times, most of the people love to flaunt a sports coupe. And if you too are one among those then you can surely go for the Nissan 240sx. In fact, the 240sx when well-modified have the ability to run and win any race whether it's on track or off track.

You can gather more information about the Nissan 240sx over the Internet. There are many portals who offer the high quality Nissan 240sx performance parts, with which you can simply custom-made your prized possession according to your tastes and requirements. With passage of time, Nissan modernized the 240sx. However, in terms of exteriors the new model was the same, but S14 Nissan 240sx was slightly bigger than its precursor.
