All That You need to Know about Intermediate Bulk Containers by [Julia Roger](#)

Article published on July 6th 2012 | [Business](#)

intermediate bulk container are containers that are generally used for storage and shipping of food products, chemicals, inflammable goods, soaps, hazardous materials etc.

These are generally used for transportation and storage of goods in huge quantities that may also include fluids and chemicals. The construction of the container and the storage capacity depends upon the goods which are to be transported or carried. These may be made of plastic, steel etc. depending upon what it is being used to store.

Where one can get these containers?

Going through the Yellow Pages or surfing the net or sourcing relevant industry contacts which have already used these containers is the easiest way to find a list of IBC for sale manufacturers. You can see the details of these companies and approach them for further purchase or lease details.

Advantages of Intermediate Bulk Containers:

Using cubical shaped containers allows you to store and ship huge quantity of goods using maximum space for maximum quantity.

These containers can be used for transporting hazardous chemicals, oil, food etc.

These containers are generally wide mouthed that helps in easy filling and removal of the goods.

Specially designed containers are also used for transportation of pharmaceutical products. Capsules, tablets and medicinal powders are also transported through Intermediate Bulk Container.

Goods can be transported in bulk from one country to the other, where goods can be packed and sold to the ultimate consumers in accordance with the terms and regulation of that country and in their language without causing any damage to the goods so transported.

In the year 1997 the United Nations has enacted Specifications for Intermediate Bulk Container for Transport of Dangerous Goods thereby specifying the requirements that are to be compiled by all companies intending to transport dangerous goods through Intermediate Bulk Container.
