Basic Information about BES Client Access Licenses by Samantha Cole

Article published on March 9th 2012 | Business

Many popular companies these days have been choosing the BlackBerry Enterprise Server (BES) as their enterprise server. For them, BES has drastically strengthened their organization and work flow, as well as offered them a highly protected and dependable system for their employees and managers. Below are a few of the basics that a BES may do for you.

BES makes it much easier to manage the Information Technology needs of your establishment. BES software gives your IT the potential to send hundreds of applications to your employees to greatly enhance scheduling and management. BES also broadens your group management functions by enabling you to nominate your employees into groups and subgroups. The software also increases your up time as it furnishes you with available monitoring capabilities and improves the way you acquire reports and alerts by offering you with visual references like charts and files.

If you're an end user, BES will render you more authority over your work computer through the BlackBerry smartphone screen. This will enable you to access to and look at your office files although you're out on an appointment or even on a vacation. It will also increase your production considering that you can do your work wherever you are.

BES Client Access Licenses. After you have BES installed, you can now buy any number of BES Client Access Licenses online. Nonetheless, there are BES companies that require you to buy a specific number of licenses that will evoke you to purchase CALs you won't actually need. It would be more desirable if you choose a Blackberry Enterprise Server licensing firm that allows you to acquire just the CALs that you and your business will use.

It is also essential that you buy only legitimate BES CALs for your company so you can avoid any work-related possibly even legal problems afterwards. An authentic BES CAL will include the required licenses that will be verified by the servers of the BES CAL developer. BES CALs connect only the individuals that have the licenses on their smartphones. Make sure to buy one Blackberry Enterprise Server license for each applicable worker in your company.

If you wish to use a BlackBerry Enterprise Server for your business, you can request your wireless provider about it. They can provide you helpful information on particular issues that are unique to your business. You can also browse online for BES companies that can offer you a trial version that lasts from 30 to 60 days, which enables you examine the server without shelling out extra cost for your company.
