Bluepost coupons enhance accessibility to Bluepost services by James

Article published on December 31st 2011 | Business

Bluehost is an American web hosting company that was set up in 1996 and is based in Utah, USA. It is a very popular web hosting company used by personal site owners, business owners and resellers. In its service offering: Bluepost offers one regular hosting plan and three reseller plans. The regular hosting plan offers unlimited hosting space, unlimited domain hosting, unlimited file transfer and unlimited email accounts.

The three reseller plans are:

i) Sky Blue which offers resellers 100 GB of disk space, 15 Mbps of bandwidth, a free domain name and unlimited accounts, and is priced at $19.95/month.

ii) Electric Blue which offers resellers 250 GB of disk space, 25Mbps of bandwidth, a free domain and

unlimited accounts, and is priced at $49.95/month.

iii) True Blue which offers resellers 500 GB of disk space, 35 Mbps of bandwidth, a free domain and unlimited accounts, and is priced at $99.95/month.

Other than the above hosting plans, the Bluehost also offers shared hosting plans which come in two varieties:

i) Basic plan which offers users unlimited disk space, unlimited domain hosting, IMAP and POP3 e-mail support, a domain name for one year, add on and parked domains, subdomains, unlimited site transfer, unlimited forwarding e-mail accounts, among other useful features.

ii) Pro hosting plan which offers users the same features as the basic plan, as well as free domain privacy, more CPU, memory, and other resources, a dedicated IP address for free, a free SSL certificate, free anti-spam accounts, among others.

Their shared hosting plans all come with â€˜VPS protectionâ€™ which provides protection to websites on a server

from other websites on the same server which have a tendency of using up more than their share of resources. It does this by restricting the usage of resources by those sites that have been found to be exceeding certain parameters. As a result of this feature, most websites enjoy as high as 99.9% uptimes which is a very high level for the industry.Bluepost then goes a step further by making the services easily affordable by its customers, through the

Bluepost coupons. The coupons basically offer a discount to customers on the various hosting plans that the company offers. For example, the regular hosting plan goes for $7.95 per month for 12 months term, or $6.95 per month if purchased for a period of 24 months. With a Bluepost coupon, it would be available for only $3.95 â€“ a savings of about half the initial price! As far as the shared hosting plans are concerned, the Basic plan is retailed at $6.95, but with a coupon, it only costs $3.95, while the Pro plan is priced at $24.95, but with a Bluepost coupon, it only costs $19.95.

The coupons are available online, and do not require to copy or memorise a coupon code. All one has to do is to click on the couponâ€™s link and it takes you to the order page on Bluepostâ€™s website showing the already discounted price. You then simply complete your purchase.
