Article published on December 22nd 2011 | Business

Although often ignored, door furniture has a great role in beautifying homes. Doors not only make us feel safe and comfortable but also add to the beauty of our houses. They can be furnished with variety of handles and knobs, which not only ease opening and closing but also beautify them by virtue of their shapes, styles, and colours. Ceramic door knobs are getting popular now days due to their versatility, economy, and ease of installation.

There are many reasons why ceramic knobs are being preferred for door furniture. They are inexpensive and available in a number of colours and shapes that can be used on doors of any colour and shape. Their varsatility allows them to be used anywhere, whether it is an entry door or a bathroom door. The knobs used on entry doors have locks and latches fitted with them while those used on bathroom doors have privacy sets to lock them from inside. They are highly affordable as compared to metal door knobs.

Ceramic door knobs are available in different shapes and sizes, mostly around 2.5 inches in diameter. They are available in different finishes too. The most common finishes available are normal brass, antique brass, chrome, satin nickel, and oil rubbed bronze. They can suit your requirement for any type of doors due to variety of the colours and shapes they are available in. They are available in standard colours like white, brown, and black, besides ivory and almond colours. All these colours are available in Victorian, Prairie, and Meadows styles.

Another feature of ceramic door knobs is that you can have them ordered to match the style of your door if they are not available prefabricated. You can get custom designed knobs from a large number of manufacturers. For example, you can order the knobs designed shaped like Mickey Mouse or any other cartoon character to use it on children’s drawers. Ceramic knobs are easy to install. Athough inexpensive, antique style knobs are a bit costilier. However you won’t find them very expensive if you compare the price with the value they provide by adding elegance to your doors.

By virtue of their varsatility, ceramic knobs can be used on cabinets, show cases, bathroom and bedroom doors, and on the doors leading to the gardens or patios. They are so varsatile that they can fit in any design scheme, from simple standard colours to detailed Victorean pattern.

Ceramic knobs have been popular in United Kingdom and other parts of Europe for many years; they are also getting popular in United States. Available in wide range of colours, styles, shapes, and different prices, ceramic door knobs can best fit your home doors. However, it is important that you make a good choice based on your budget. Before buying, you need to consider price, ease of installation, durability, and their fitness to the colours and designes of the doors in your home. Although ceramic knobs last longer than metal knobs, they are easily broken if dropped or hit with something hard. So, if you have children in your home donot choose more delicate designs.
