China: Utilities covers China economic overview, Asia-Pacific utilities industry overview, China utilities industry overview, and the country's electricity, water, and gas utilities markets. It also covers the market trends in terms of water shortage, wastewater treatment, renewable energy, and demand for natural gas in China, plus the comparative matrix and SWOT analysis for the industry leading players: PetroChina Company Limited (PetroChina), China Petroleum & Chemical Corporation (Sinopec), Datang International Power Generation Company Limited (Datang Power), and China Power Investment Corporation (CPI).

Executive Summary

Chinaâ€™s utilities industry has been experiencing rapid growth in recent years, although a deceleration occurred in 2009 due to the global economic downturn. The report covers the three utility groups in China, namely the electricity, gas, and water utilities industries. China accounts for more than half of the regionâ€™s power consumption, with prospected growth averaging 7.6% per annum till 2030. The U.S. Energy Information Administration (EIA) projects Chinaâ€™s installed electric generating capacity to grow by an annual average rate of 3.6% to reach 1,686 gigawatts (GW) by 2030.

Current market trends and issues in the Chinese utilities industry include the severe water shortage and pollution problems, building of wastewater treatment facilities, development of renewable energy, and rising demand for natural gas in the country. The EIA projects that China will lead the way in adding hydroelectric and renewable electric generating capacity, such as solar and wind power. http://www.bharatbook.com/market-research-reports/energy-market-research-report/china-utilities-industry-2h11.html
