Semiconductor Market in China 2011-2015

TechNavio's analysts forecast the Semiconductor market in China to grow at a CAGR of 24.5 percent over the period 2011-2015. One of the key factors contributing to this market growth is the growing ambition of domestic players to lead the market. The Semiconductor market in China has also been witnessing huge CAPEX investment from global players. However, the growing concern about intellectual property rights could pose a challenge to the growth of this market.
