Article published on June 13th 2012 | Business

The Computed Tomography Scanner market will likely to experience a huge growth in the coming years. Computed Tomography is the major contributor of the growth in the medical imaging industry in India. Continuous up gradation in the CT technologies is the most common trend. Due to introduction of various applications and combination of nuclear medicine with CT technologies, the disease coverage capabilities of CT are increasing over time. CT scan can detect various diseases and continuous improvement in image quality facilitates the diagnosis with much higher accuracy level. Oncology and cardiology are mainly driving the CT scanner segment.
