Article published on June 8th 2012 | Business

When you buy any brand car it becomes mandate for you to maintain it properly but there are also situations where you cannot do anything to make things better. There are nearly millions of car manufactures local and international but only a few brands make a mark. Among such brands one of the most famous brands is Volkswagen. Like all other machines, cars too can go wrong and some car parts and Car spares may not work. In such situations it is necessary that we all use the best and most genuine part of the car to bring it back to the original performance status.

There are two types of Vw parts available in the market, the OEM parts and the Aftermarket parts. Here, we will learn the difference between the two, after which you can easily make a choice for purchase. OEM parts also known as original equipment manufacturer parts are genuine car spares made by the car manufacturing company. And aftermarket parts are the parts that were developed after the car was manufactured and in the market for sale and use. Some of these aftermarket VW parts meet all the basic engineered requirements of the car, this helps in making the car perform smooth, but there are also some, which do not meet the requirements. They might look alike but definitely slows down your performance. OEM parts are genuine, they cost a little more sometimes a lot more but they guarantee to last for few more years without any detoriation in performance. If you buy from a wholesaler then you may land up paying less for OEM parts too.

Therefore, we can say there are two kinds of difference- one is the price and the other is performance. Check the pros and cons and then decide which car spares is the best option for your Volkswagen.
