Economical and Environment Friendly Rubber Mulch

by Angie Turner

Article published on May 29th 2012 | Business

As the world is becoming globalized and developed, the environmental hazards and pollution are also increasing. The natural elements are being degraded continuously and there has been an increased concern about the environment. This newfound awareness has lead to the encouragement of recycling of products and protecting the communities. One such product is the rubber mulch, which is being considered a hit among the people as a garden and landscaping product in the market.

Made from the recycled rubber truck tires, this product is cost effective, non-toxic, and completely safe for play and is available in a variety of colors. Today it is frequently used as rubber mulch for playground, landscaping, athletic fields, flooring and horse arena footing. It is a virtually indestructible form of mulch and is considered the most secure, sturdy and the most economical choice.

This recycled mulch not only conforms to CPSC guidelines, it is also clean and odor free. It also reduces dirt mud and insects and as it has a lifetime warrantee, it is very cost effective. Not just this, rubber mulch is also non-toxic, non-staining and non-abrasive. Regardless of the weather, it acts like a cushion on the ground and shields the children from playground injuries. This mulch made out of rubber tires, not just protect plants my limiting the growths of molds and fungi, it also preserves ground moisture, as it does not absorb any. This usually comes with a ten-year manufacturer warranty and has a great quality of not fading for 12 years and do not decompose for 25 years.

By having a huge advantage over the conventional wooden mulches and lasting very long without replacement, this type of mulch is a viable option for everybody. Being cost effective, it not only is a great option for the consumer but also ensures the safety and protection of the environment.
