B2B is the short form that is used for Business to Busines. A company that selects a B2B plan decides to sell its products

directly to other business. B2B implies that both the seller and the buyers are business corporations. Using the Internet to make easy B2B (Business-to-Business) commerce promises a lot of benefits, such as dramatic cost reductions and superior right to use to buyers and sellers. The company focuses on selling products that another company wants to purchase. The B2B (Business-to-Business) strategy, the business has fewer clients, but every client has a better budget and makes a better order.
