Railcar Hercules - Marvelous for mid-range loads

Whether you have to ship in raw materials/machinery or ship out finished products, railcar movers offer the most cost-effective, dependable and completely safe freight movement solution.

Trackmobile, the leading manufacturer of powerful and technically superior railcar movers can provide the exact railcar mover for you. And if your material is in the mid-range size loads, their latest and most innovative mid-range load freight railcar mover Hercules Trackmobile will be the very thing for you to satisfy all your needs most adequately.

Why choose Hercules?

Are you wondering why choose Hercules Trackmobile from the three latest and most innovatively designed railcar movers - Viz - Titan, Viking & Hercules? Why not others? This is because Hercules may be what you need. This may give just the exact pulling capacity - right when you need it; neither more nor less - just the right capacity. Hercules is probably the only railcar mover capable of customizing the tractive effort to exactly to suit your needs; and assuring significant savings during operation and maintenance!

What makes Hercules special? - More power when you need it!

Hercules makes the perfect choice for material movements in southern United States - whatever your ship-load is. As its engine torque output is electronically controlled, this helps in customizing the tractive effort. By either increasing or decreasing the torque output of the engine, only the exact amount of tractive effort is generated. Also it is fitted with a ballast package providing supplementary extra weight and tractive effort when needed. Such flexible tractive effort is indeed unique to only Hercules trackmobile!

Special features of Hercules

Hercules trackmobile has -

1. Cummins QSB Tier 3 turbo charged engines.
2. Electronically controlled engine torque output and transmission (four speed) forward & reverse.
3. Hydraulic road & rail brakes.
4. Power-shift transmission - manual/automatic
5. AAR style Couplers - air operated.
6. Programmed throttle control
7. CAN-Bus System 8 with on-board diagnostic system.
8. Electronic digital display panel.
9. Seat-integrated accelerator, brake and transmission control; auto neutral gear engagement.

10. Ergonomically designed cab with operator-friendly controls and other features.

Highly satisfying Hercules Trackmobile features

What other features will make you feel satisfied with your Hercules Trackmobile performance?

â€¢ Year-round 24/7 excellent after-sales service.

â€¢ Ready access to all original spare parts.

Additional optional features are like

â€¢ MAX-TRAN for automatic weight transfer management.

â€¢ MAX-TRAC for anti-wheel slip.

â€¢ Remote ground and radio control.

How Hercules & Briggs Rails can help you

Hercules trackmobile offers you great versatility and state of art technology guidance to help you to a great extent in your material movement issues with easy and perfect on and off track mobility. So this makes for equitable fuel consumption with optimal production capacity. Highly skilled and fully trained technicians from reputed dealers like Briggs Rail (<http://briggsrail.com>) are ready to offer every help you may need. Hercules can work on world track gauges and coupler types also throughout southern United States.

Excellent investment choice

Hercules is most likely to exceed your expectations and will outperform other railcar movers by giving you long years of excellent and dependable service. Hercules trackmobile has been so efficiently designed that it can travel not only on both rail tracks and roads but also across rough and uneven terrain like fields and countryside areas. Hercules can make material movement very easy, assure optimal rail-road transport speed and guarantee smooth seamless shipments. This will naturally result in increased productivity
