Installing Your BlackBerry Enterprise Server and Having It Certified by Samantha Cole

Article published on March 9th 2012 | Business

Many top companies today have been selecting the BlackBerry Enterprise Server (BES) as their enterprise server. For them, BES has drastically strengthened their organization and work flow, as well as provided them a highly confident and dependable system for their workers and managers. Below are some of the essentials that a BES may do for you.

BES makes it much easier to cope the Information Technology requirements of your business. BES software gives your IT the capability to deliver hundreds of applications to your employees to improve scheduling and management. BES also increases your group management capabilities by allowing you to nominate each of your employees into groups and subgroups. The software also optimizes your up time as it furnishes you with available monitoring functions and improves the way you obtain reports and notifications by offering you with visual sources like graphs and files.

If you're an end user, BES will render you more control over your work computer through the screen of your BlackBerry smartphone. This will permit you to access to and check on your office files even if you're out on an appointment or even taking a vacation. It will also strengthen your development because you can do your job wherever you are.

BES Client Access Licenses. Once you have BES installed, you can now purchase any number of BES Client Access Licenses online. Nevertheless, there are BES companies that request you to purchase a specific number of licenses that will cause you to buy CALs you won't actually need. It would be better if you choose a Blackberry Enterprise Server licensing firm that enables you to buy just the CALs that you and your business are going to use.

It is also important that you obtain only legitimate BES CALs for your company so you can avoid any work-related possibly even legal issues in the future. A reputable BES CAL will have the needed licenses that will be verified by the servers of the BES CAL manufacturer. BES CALs link only the individuals that have the licenses on their smartphones. Ensure to purchase one Blackberry Enterprise Server license for each applicable staff in your company.

If you like to use a BlackBerry Enterprise Server for your business, you can request your wireless provider about it. They can give you valuable information on particular concerns that are exceptional to your business. You can also surf online for BES companies that can offer you a trial version that lasts from 30 to 60 days. This is an easier way for you to assess the server at no extra cost for your company.
