Today, there are numerous options in terms of styles and types of cheap eyeglass frames and frame material. The market is flooded with amazing choices as far as discount eyewear is concerned. It caters to the needs and preferences of all the types of wearer. From fashion prescription glasses and sporty glasses to the classy and elegant semi-rimless and rimless eyewear. There are thus different choices available in terms of material used for the lenses of the eyeglasses and its frames. Here we have provided brief information on various types of eyeglasses frames' material that is quite popular in the market today.

1. Metal Glasses

Metal eyeglasses usually come in Monel or Beryllium metals. The malleability and the corrosion resistant characteristic of Monel make it the most extensively used metal for eyeglasses frames. However, Monel has some probability of reacting when in contact with the skin. Monel is thus not totally corrosion resistant. Manufacturers make use of another steel gray metal known as Beryllium which is tarnishing as well as corrosion resistant. Eyeglasses frames made with Beryllium metals are thus one of the best options for those who spend maximum time in and around salt water and have high skin acidity. Cheap eyeglass frames made with beryllium metals are extremely light weight, durable as well as flexible. In addition to this there are several color options available with this type of discount metal eyeglasses.

2. Titanium eyeglasses

Titanium eyeglasses have garnered popularity in recent times. More and more people prefer to use titanium eyeglasses frames because of its light weightiness, corrosion-resistant and durability. Frames of most of the fashion prescription sunglasses are made of Titanium. These hypo allergic metal eyeglasses frames are available in several colors and give a classy and a modern look to its wearer. Some titanium eyeglasses frames are even combined with other metals such as copper or nickel. Beta-titanium eyeglasses are also the preferred choices of most.

3. Plastic Glasses

Plastic cheap eyeglass frames are most commonly made of nylon. However, now most of the manufacturers prefer blended nylon in order to make the eyeglasses stronger and lighter in weight. Nylons are used for sporty glasses and even for some of the fashion prescription sunglasses. Since nylons can be easily molded in all the possible shapes, they are preferred choice for wraparound glasses. For those of you who are looking out for the creative option in terms of their discount eyewear can opt for Zyl. These are lightweight as well as cost-effective. This is also the best option for those who are looking out for vibrant color cheap eyeglass frames.

4. Stainless Steel

Stainless steel cheap eyeglass frames are quite easily available in the market. These frames are the cost-effective alternative for titanium frames. These are thus best for those who prefer cheap eyeglass frames. Stainless steel frames are also hypo allergic because they are nickel free. They too are extremely light weight, low in toxicity and equally durable.

5. Bendable Glasses

Bendable glasses are most popularly known as flexon. Bendable eyeglasses frames are made from titanium-based alloy which is also known as memory metal. This is because, these eyeglasses frames regain their original shape even after they are twisted or turned. Thus bending, crushing or twisting has no effects on the frames of these eyeglasses. Flexon are thus mostly preferred material for children's eyeglasses. These are also used for sporty glasses as well as fashion prescription sunglasses.
