Numerous Concepts for Equity investment. by Market Experts

Article published on March 24th 2012 | Business

Equity market is a dynamic system that can not be packed up with few rules and strategies. However, this article provides some of the numerous underlying concepts on which an investment decision can be based.

The Indian equity market or stock market today is not particularly attractive as an asset class.

Traders can speculate in stocks, bonds, currencies, futures, options and some other kinds of derivatives. But for traditional equity investors, there are declining expectations for economic growth and corporate earnings. Goldman Sachsâ€™ latest research report for the stock market in 2012 is titled, â€œStrategies For Stagnation.â€• This makes the point perfectly.

Diversification of your equity stock portfolio

One of the major strategies followed by many investors is about hedging risks. Diversification of portfolio allows an investor to hedge his/her investment risks by distributing his/her funds among different kind of securities. For instance, a balanced portfolio is the one that has a combination of regular dividend generating equities, stocks with good growth prospects, and stable equities to protect the amount invested in the share market.

Strategies for aggressive equity investors

Aggressive investors are dynamic and active players of the stock market who devote comparatively more time and effort in management of their portfolio. They have a greater appetitive for risk and in turn they expect higher rewards for their tireless efforts. Some of the strategies for such players are:

â€¢ Pay more attention to the economy and market than the company you invest in. Monitor and analyze the environment keenly.

â€¢ Pay attention to growth shares and try to predict profits ahead of the stock market.

â€¢ In bullish environment, try to leverage your assortment and take prompt corrective steps, when required.

Strategies for conservative equity investors

Conservative equity players are not very adventurous and have a comparatively low risk appetite. Some basic strategies that these safe players can hold to are as follows:

â€¢ Spend some time listening to equity news in order to look in for safe investment opportunities in the primary equity market.

â€¢ Avoid investing in certain kinds of shares such as unlisted, manipulated, concerned, and inactive shares.

â€¢ Avoid short-term switch hitting and follow a strict screening criterion.

â€¢ Seek advice from portfolio managers or go through guidelines given by online websites.
