Red Box Supplies is able to supply the leading conveyor rollers by [James Blee](#)

Article published on June 16th 2012 | [Business](#)

As a family-run business with over twelve years' experience supplying all manner of commercial and industrial conveyor rollers, conveyor belting, and additional products each of which are integral to the manufacturing process in a diverse range of industries, Red Box Supplies stands tall as one of the foremost businesses in the manufacturing sector.

Our diverse portfolio of customers has seen us supply both local and regional companies with some of the most innovative and sought-after conveyor rollers, belting and other ancillary products. As we've grown so has our product range, and today our diverse stock includes standard and bespoke conveyor rollers that will suitably fit into all manner of environments.

Despite the fact that the business has grown we've kept our traditional values. Red Box Supplies are proud that twelve years after the business was founded we still have a portfolio of clients that were with us in year one. Now if that isn't a testament to the superior levels of customer service I don't know what is!

Here at Red Box Supplies we're proud to have the capacity to manufacture both standard and bespoke conveyor rollers, Skatewheel conveyors and Flat Belt Conveyors. Our innovative designers can also supply you with competitively-priced gravity powered conveyor rollers to suit a number of different applications. All of the frames that our conveyor rollers use are laser cut to precision and feature rounded corners from two point five millimetres to three millimetres. They are finished in either powder-coated steel in any RAL colour or in stainless steel. These innovative conveyor rollers also feature adjustable feet or castors for easy transport around your premises.

If you'd like to view examples of the sublime conveyor rollers that we can offer, if you'd like to find any information about the range of conveyors, or additional products that we offer, or if you'd like to contact us to discuss any bespoke queries, then come to our website at: www.redboxsupplies.co.uk.
