Shower Screen Usage in Sydney by [Jamess Jany](#)

Article published on July 19th 2012 | [Business](#)

Shower screens are compartmentalized areas in bathrooms and are designated for taking a shower. They add aesthetic value to bathrooms while ensuring that the dry region of the bathroom remains dry. Certain designs of shower screen like the transparent ones make the bathroom appear bigger.

If you wish to install a shower screen in your bathroom, you can search for shower screen Sydney and visit them with your requirement. Generally, they would send their staff to your home and measure the bathrooms and the size of the shower screens that you require and place a quotation based on the size and the style required. The home visits and quotations are seldom charged and are a free service. Most of the manufacturers in Sydney shower screens can match the decor of the shower screen with the decor of your bathroom. This adds aesthetic sense to your bathroom while maintaining the hygiene levels.

Better Option To A Shower Curtain

Shower screens are a better alternate to shower curtains. Shower screens are generally made of plastic, tempered glass, or a combination of both while shower curtains are made of cloth, vinyl, or hemp. You would have noticed that mold and mildews easily develop on a shower curtain. This is not so on a shower screen. Shower screens are easily cleanable and much easier to maintain. They are also cheaper to clean as compared to shower curtains. Shower screen are far more durable compared to shower curtains due to the material used. Shower curtains need frequent replacements as they cannot be repaired easily.

In certain occasions, shower curtains do not fully block the water from seeping out while you can block 100% of water seepage in a shower screen.

Kinds Of Shower Screens

Shower screens can be incorporated in bathrooms that are big as well as small. You can tweak the design of the shower screen as per the size of your bathroom. There are various options available for shower screens in Sydney. You can make a shower screen in your bathroom with a frame or without a frame. You could also semi frame your shower screen structure. There are retractable shower screens too. You can fold out these shower screens when not in use. The advantages of these kinds of shower screens is that while they serve their utility, they do not take additional space in your bathrooms.
