Article published on January 18th 2012 | Business

Four wheel vehicle owners are definitely a class of their own. It is not uncommon for a 4-whelel drive owner to have thousands of dollars in accessories on their vehicle. And, for the 4-wheel drive owner, the name Smittybilt is common language, as Smittybilt parts and accessories are in a class of their own. Smittybilt has many fine parts and accessories, including the following.

Smittybilt Winches

For the 4-wheeler, the winch is one of the most important parts of the vehicle, as without it, you'd spend half your day digging out of ditches when 4 wheeling. Smittybilt build high performance winches with different styles and sizes to choose from including hydraulic and electric winches.

Hydraulic winches are best for commercial, ranch and farm use, and electric winches are best for off road recovery purposes.

To choose a winch with enough power to pull your vehicle, you should choose a winch that has the minimum capacity of the weight of your vehicle multiplied by 1.5. For example, if your vehicle weights 5000 lbs., then you should choose a winch with the capacity of 7,500 lbs.

The Smittybilt XRC is one winch that is a high performance winch and features that include the following

Smittybilt XRC

* 8,000 lb. rated single line pull

* 5.5 horsepower Series Wound motor

* Remote control switch, 12' lead

* Three stage gear train planetary

* 172.8:1 gear ratio

* Rotating ring gear clutch

* Automatic in-the-drum brake

* 2.5 x 8.75 mm drum

* 94' 5/16 diameter wire rope

* 4 way roller fairlead

Smittybilt Seats

Smittybilt seats are another of Smittybilt's fine accessories and are some of the most durable and comfortable seats on the market. Smittybilt feature many different styles in their seats such as the Smittybilt XRC 10 HD which is a high quality seat that is a wonderful selection for 4 wheel drive

vehicles.

Smittybilt seats are available with or without comfortable fabric facing. This ensures the most comfort in both the warm summer and the cool winter. With the facing during the hot summer months, the fabric facing will help to provide a cool seating, and vice a versa in the winter months. The seats are reclining seats with a mechanism that provides the ability for the 4-wheel drive owner to install the seat on the driver's side or the passenger's side. The seats are designed with a comfortable spring suspension and custom molded foam, and bolt directly to the factory mounts without the need to drill.

Smittybilt seats are available for many different types of vehicles and definitely a quality choice in a seat for your 4-wheel drive.

Smittybilt parts and accessories are quality and durability combined. The materials that Smittybilt uses in the construction of their parts and accessories are first rate. Smittybilt is a name that is trusted in the 4-wheel drive community and one that has been servicing that community for a number of years with high quality and high performance parts and accessories. Smittybilt parts and accessories can be found online through many different reputable suppliers who are offering the parts and accessories at a great value.
