Article published on April 12th 2012 | Business

What is a stock or equity market? Stock Market is an structured place or association where shares, stocks, and bonds are bought and sold or can also be traded at an agreed price.

What is a stock?

A Stock is a document that represents ownership in a corporation. These are also called equities. Example of equity is your car, which is one of your assets. Portions of your business are also an example of equity.

The investment return of stock is determined two ways - first, the corporation may pay a dividend to the shareholders; second, the market value (or price that others are willing to pay) of the shares of stocks may go up or down. Together this profit is considered to be the "total return". The average return over a ten-year period for stocks (or equities) is 10-12%. The stocks are listed and traded on stock the exchanges, which are entities of a corporation, or mutual organization specialized in the business of bringing buyers and sellers of the organizations to a listing of stocks and securities together.

Stock or equity markets have always been indefinable to the common mansâ€™ dream of earning quick bucks. They are like a childâ€™s play ground requiring courage, passionate to excel and being a step forward than your competitor. However discipline is paramount and identical to success. A disciplined investor knows how to limit losses and maximize profits.

The word market pertains to the activity of buying and selling. This market can be a private or public market. Stock Market is also called â€œEquity Marketâ€•. Thus, the basic function of a stock market is to recycle capital from savings into investments. It enables public or private companies, governments, and local authorities to raise capital by selling securities for investors.

Do not take the trades that are too risky, simply because they feel the need to remain on the market at all. Learn patience to wait for the best trades. learn that the Big Picture online exchange mixtures to understand the details and see the big picture. It is important to understand the big picture that individual losses will not cause to give up, if you see an advantage in staying power.

The ingredients of victory in a stock or equity market are very basic namely surplus money, risk appetite, intuitive skills, rational approach and a flexible strategy.

Equity trading involves all norms and policies that are followed profitable though the point found in a portfolio management strategy.
