Tips to choose a Staten Island Lawyer by [AGLawNYC](#)

Article published on August 8th 2012 | [Business](#)

A Staten Island lawyer can assist you with your legal problems, offering advice and counsel. First, however, you need to find a lawyer that you are comfortable with and whose abilities you are confident in. Below are some suggestions to use as a guideline when seeking a Staten Island lawyer. Even if you don't need a lawyer at this exact moment, keep these tips in mind for a later date. At some point in your future, it is likely that you will need to seek the counsel of a lawyer.

1. Just as you would not leave your kids with a babysitter that you never met, you should not hire a lawyer who you have never met with or have never spoken with over the phone. With that said, don't hire a lawyer from a television advertisement. Just like a commercial trying to sell you the latest gadget, a lawyer's television commercial is trying to sell you his services. Rather than being convinced to hire an attorney, wouldn't you prefer having the power to choose your Staten Island lawyer after you have learned about his credentials, experience, and area of expertise?

2. One method to learn some background information about a potential lawyer you may hire is to ask family, friends, and co-workers to refer you to a Staten Island lawyer. These people may be able to recommend a lawyer that they personally have worked with, or can put you in contact with an acquaintance of theirs that had a positive experience with a lawyer. When asking your friends and family for a referral, be sure to specify what area of law you are seeking a lawyer in. For example, are you seeking a worker's compensation attorney, a real estate attorney, or a Social Security Disability attorney? Specify this when asking for a referral.

3. If you did receive a referral for a Staten Island lawyer, be sure to ask your referrer detailed questions about his or her experience with the attorney. Ask questions about the communication between the Staten Island lawyer and his client, the lawyer's fees, and his credentials. Oftentimes, someone else's experience with a lawyer will be similar to your own, especially if you all sought the lawyer for a similar reason.

4. Search engines are great tools to learn more about potential lawyers you may hire. Visit the Staten Island lawyers' websites, and read any articles that you find about the lawyers while searching the web. You may find testimonies from past clients about the lawyer as well. Read all available information about the lawyer, as it will help you to form a well-rounded image of the Staten Island lawyer.

Do not become overwhelmed with your search for a Staten Island lawyer. Gather a list of potential attorneys, and as you find more information about each one, weed out any attorneys who do not have a reputation or who do not cater to your needs. With a little time and research, you can find a Staten Island lawyer who is the right fit for you.
