Smoothness and accuracy are the two main benchmarks for judging the standard of the mechanism of a Notebook Mouse. Smoothness is very essential as the Mouse needs to be moved in multiple directions quite frequently and accuracy is required to place the cursor at the spot and in a flash. Mice with cables are on their way to extinction as they lack accuracy and smoothness that a person working on a Notebook PC needs. If you are using one, throw it to the bin and make things smoother for yourself by installing a Razer Notebook Mouse, better known as Razer Pro-Click Notebook Mouse, which has been specially designed for frequent uses.

The biggest reason why you should replace your existing mouse with a Razer Notebook Mouse is that it's wireless. There is no risk of sudden breakdown of your mouse due to tamper in the wires, which is a very common problem. Razer Notebook Mouse or Razer Pro-Click Notebook Mouse works through Bluetooth 2.0 connectivity, a frequency level that ensures 100 percent accuracy in performance of the gadget. It's powerful enough for you to work on your Notebook sitting at a fair distance from the machine. The Mouse comes with a high power laser which makes it equally workable on all surfaces.

Slippery body with bad grip of general mice often irritates the user, especially in pressure situations. By installing a Razer Notebook Mouse, you can say bye-bye to the irritations as the Pro-Click Mouse features ergonomic ambidextrous design and a non-slipping grip. Its small, its sleek and it's non-slipping rubber grip is perfect for wild mobility.

Another point where Razer Notebook Mouse scores over mice of other brands is installation of driver. As it works through Bluetooth connectivity, you do not need to install any driver for it and eat up some space in your Hard Disk. Simply activate your Notebook's Bluetooth and get on with your work with hundred percent accuracy, smoothness and comfort.

Short battery life is a very common hazard of using wireless mouse, but not so when you use a Razer Notebook Mouse. Unlike gadgets of other brands, Razer Notebook Mouse comes with long battery life that ensures continuous usage. You can also save battery life by deactivating the Bluetooth while taking a short or long break from work.

Razer Notebook Mouse comes in a pack which includes a travel pouch for protection and portability of the gadget. The smart looking Bluetooth Mouse is available in four colors- Black, White, Red and Pink among which the last one is sure to melt heart of young ladies.

So get rid of your fragile, cabled, slippery scroll mouse and bring home Razer Notebook Mouse to gain enhanced smoothness and accuracy. Razer Notebook Mouse has got a great compatibility which lessens your configuration worries. What you just need is Bluetooth 2.0 connectivity.
