Article published on April 17th 2012 | Communication

Look around at any place of public footprint. You will find almost everyone going mobile. Yes, going mobile is no longer expensive. And with amazingly reduced mobile prepaid recharge plans from few of the top network operators, subscribers only have reasons to rejoice for staying connected for long hours with people who matter to them most without worrying about the tariff or the pocket! In todayâ€™s highly competitive market, you can expect to call cheap using tariff plans at denominations as low as Rs. 5. It is no surprise if you come across a plan that lets subscribers call cheap at 1 paise for every 2 seconds. Explore the various available options; this will help you make a comparative analysis. You can then use the best mobile prepaid recharge plan to your advantage.

Mobile telephony has indeed taken the world by storm. Students, housewives, auto drivers, bus drivers, executives, entrepreneurs, professionals, small time traders, big time traders including even those who stay idle use a mobile phone. It has become the most important component of our lives. Just exclude this device from your lives and you will realize how difficult it is to live even a single day without it. It will seem as if everyone is so far away from you and activities seem to stop. Every subscriber does want to call cheap irrespective of whether it is a local or STD or ISD call. You will come across dedicated mobile prepaid recharge plans in the market for local, STD, and ISD calls. Explore them and choose the best. A bit of research will let you call cheap without worrying about the tariff.

Mobile prepaid recharge is going to get a lot simpler; thanks to the implementation of 'Consumers Protection Regulations, 2012' by telecom regulator TRAI's (Telecom Regulatory Authority of India). The regulation came into force on March 22, 2012. Tariff of prepaid recharge plans is now more simplified; subscribers can understand the plans better.

The mobile prepaid recharge market in India is vast. As of January 2012 statistics, a total 8.44 million new GSM subscribers were added out of which Uninor topped the new additions. The subscriber base reached 648.08 million with 1.32 percent increase from previous month. Offline and online recharge are the two options that the Indian recharge market is split into. When we speak about online recharge, the scope is limited to computer literate subscribers and those who have the know-how of going for the same. Compared to offline, online recharge is yet to gain more momentum. But what matters rather than the recharge mode is the availability of various mobile prepaid recharge options. It is scratch cards that are distributed by mobile service providers through retail outlets for offline recharging. These retail outlets may range from mobile shops, mobile repair shops, and stationery stores to the more generic pan shops. Online recharge is facilitated at the service providersâ€™ respective websites or through partner sites. Call cheap to your friends and relatives availing the right recharge plan.
