A Desktop Wallpaper is a Great Way to Personalize Your Computer by [Edmund Brunetti](#)

Article published on December 18th 2011 | [Computer](#)

Whether you are a student, a working parent, a non-working parent, a single parent or for that matter anything at all, one thing everyone in the world today has in common, is the computer. There are hardly any people you will find who don't know how to operate a computer. Even knowing the basics are enough. No one in the world today would be able to exist without a computer!

School assignments, work assignments or a hobby- the computer is the basis of everything. All school related projects and tasks are done with the help of a computer and so is recreation. People stream videos, music and movies on their laptops to watch them at leisure. So it is safe to say that one of man's most important possessions today is his computer.

Because the computer is so vital, people take extra care of their computers. They get the machine checked regularly, update software etc. but very often they forget something important- to personalize it. Personalizing or customizing your computer is very important for it reflects your personality and who you are as a person. There are many ways you can personalize your computer. Use your own creativity to decide what to do. Customizing your laptop is essential for it is visible for anyone to see and often people will judge you by the way your laptop looks.

You can do this in many ways. You can buy laptop stickers in different patterns and cartoon shapes if you are fond of cartoons. You can buy a computer cover in an attractive color like purple or green or even a different texture. You can buy laptop sleeves in different colors like green, red, purple, blue, silver, black or white as per your taste. Any color looks good. You can even buy laptop skins. They are shaped exactly like your laptop and fit on the top and bottom so that it looks like your laptop is of a different color. You can choose a texture like satin finish, glossy finish or rubber finish. These skins along with making your laptop look better also protect it from scratches and dents.

If all this however, is too cumbersome or simply too expensive for your liking, then you can opt for an easier, cheaper, faster and non-permanent way of customizing your laptop. The answer is desktop wallpaper. A wallpaper can work wonders. For example, a great wallpaper that motivates you, may impress upon your boss how serious you are about the work you do. Desktop wallpapers are an easy, inexpensive and creative way to show who you are, what you like and dislike and how you like to lead your life. You can download all sorts of wallpapers from the internet or even make one yourself if you are the creative type.

Free wallpapers are all the rage on the internet. They are easy to search for and take not even 30 seconds to download. You can keep changing your wallpapers as and when you want and there is no dearth of choices on the internet. Be sure to choose a free wallpaper that you really like for a desktop wallpaper can make or break your mood. It can motivate you, improve your mood and generally make you happy.
