Aspire is a trusted model from Acer blending performance and style in an ultrathin device matching on-the-go lifestyle. With its multiple connectivity options keep your family, friends and colleagues in touch. Bluetooth 3.0+HS, Wi-Fi CERTIFIED technology, Fast Ethernet, or optional 3G are to make sure nothing stays away from you. Share files and documents, organize meeting through video conferencing, use social network and do more. Intel Atom processor, LED-backlit display and 8-hour battery backup are enough to let your merry-go-round; no matter whether you doing multitasking enjoying high definition blockbusters or playing game. Also, give your style quotient a boost with the selected colors from: Aquamarine, Diamond Black, Sandstone Brown, Ruby Red and Seashell White.

Read Acer reviews if you are determined to invest for a suitable companion. Analyze system configuration and match your requirement and enjoy non-stop performance anywhere anytime. Like other hardware device, the Aspire model is too subjected to issues and errors. Hardware assimilation is such that it requires least attention; usually it's the software components where you may stumble upon. Issues may be regarding installation, activation, update and upgrade of system software, application software and drivers. Setting up and configuring peripherals and Internet connection can be a bone of contention, being a new user. Amid growing Internet threats, and flooding of rogue software, you should be extra careful while managing the security settings. Malware may create contending instances damaging the system software, corrupting stored data and files, blocking trusted websites and worst they can do is to pilfer through personal information and sensitive files. Some are repairable while others are totally out of control.

Acer Aspire support is a worth to visit portal if you are looking to get support for your product. Whether you want Windows Support, MS Office support, e-mail support, browser support, Windows Live Support, Microsoft Security Essentials Support, or other, you can enjoy unlimited assistance for each. Subject-matter-experts are available to take care of each and every product version running on your Aspire system. They can install, activate, update, repair and upgrade Windows and other applications besides setting up and configuring e-mail, browser, Windows Firewall, web-based services and more. Don't forget to configure the security settings of your social network where you are spending bulk of your time. Nowadays, Acer Support is available online so just you have to call on the Acer Support number and let experts to troubleshoot the system.

Knowing a bit troubleshooting tips is must for everyone. You should know how to fix frequent issues such as system startup, slow performance, memory error, Internet connectivity issues and more. Instead of calling for tech support, you may try to use built-in system utilities to fix those problems. Suppose, if you are getting Windows booting issues then access the (Msconfig.exe) in Windows XP or explore the Action Center in Windows 7, and diagnose and fix the issues in a quick and easy manner. Perform disk cleaning for defragmentation on regular basis to keep the memory system sound. Don't clutter your hard-disk with unwanted programs. Following these norms, you not only save hard-earned money but also stay away from a range of issues which deteriorate Acer performance, thus, eating up your valuable time.
