Bluetooth Keyboards for Tablets, Epads and iPads by [John Smith](#)

Article published on March 12th 2012 | [Computer](#)

When it comes to keyboards, it has to be comfortable to type on and easy to handle. There have been many improvements on keyboard designs created by manufacturers worldwide, but nothing compares to the latest technology-Bluetooth keyboards.

Bluetooth keyboards are a tiny laser device which projects the virtual keyboard on any flat surface which you can type on accompanied with the click sounds which you get while typing on a real keyboard.

It sounds like magic and it will feel like one when you have your hands on this latest Bluetooth keyboards. There are number of laser virtual keyboards in the market today and it can be quite confusing to choose the one that best suits your needs.

Teenagers would require Bluetooth keyboards with basic functionality but they seem to go for the ones which offer cool features and all the fun and frolic that come with it. The professionals will not bother with the frills but rather choose a Bluetooth keyboard with high quality and maximum workability. It's therefore worth spending some time classifying your requirements before hitting the retail or online gadget stores.

Once you know your specifications, you can buy a Bluetooth keyboard that exactly suits your requirements. And believe me when I say this. You will have people actually turning their heads which you pull this chic device out of your bag or your pocket (yes, it's that compact!) and place it on your table to compose an email on your Bluetooth enabled cell phone or PDA.

Bluetooth Keyboards have 63 keys and a full size QWERTY layout. You can type with the same speed you used to type on your normal keyboard, but with more ease and comfort. All you have to make sure is to have a flat surface for the virtual keyboard to display.

The battery life of Bluetooth keyboards is amazing. You can type for 120 minutes continuously with a single recharge. Plus it is quite tiny; only 3.5 inches high.

Now have you heard of any keyboard that is so portable? I guess not. So what are you waiting for? Get your very own portable Bluetooth keyboard to impress your friends, colleagues and everyone around you. You can't be that modest when you are using the coolest Bluetooth technology-a portable laser virtual Bluetooth keyboard!
