Article published on May 11th 2012 | Computer

Recently, Blizzard community manager Bashiok said in an interview that the upcoming "Diablo game item auction house of God" will be built, if a cash only received "Diablo 3" gem sellers pay 15% +15% Total 30% of the commission to Blizzard; then peddle "Diablo 3" equipment sellers, in addition to management fees of $ 1 per piece, if he want the turnover be realized, Blizzard would charged 15% of the procedures fee.

For "Diablo 3" auction system, the industry own different view: although the plot the beta version of "Diablo 3" is single, and the process is shorter, but it also maintain the heat of players, largely because its auction system take a lot of fun. But every coin has two sides, to obtain "Diablo 3" achieve big success in the world, the most important thing should be how to prevent the professional goldsmith studio, and they may lead auction system lose the designed goal in complete.

Player A take the view that hand-goldsmith studio will not have a a great impact to price and the "Diablo 3" stochastic system and Blizzard operational attitude doomed automatically goldsmith will not much amount. At the same time, the regional division of the server is limited.

Player B thinks that, in fact, play goldsmith is not terrible, but hopes some men to leave the situation, do not to build plug-in, with the hang time we have lost more something.

But other gamers who think that their analysis does not make sense, and can even be said that they just do not understand this game. The most important of this attractive game is not the AH, but teamwork and MF fun. And the appearance of AH, is not to eliminate the goldsmith studio, but in order to let each player can become a goldsmith studio.
