Draytek Vigor 2850vn â€“ a Highly Efficient Router

by Mary Porter

Article published on June 23rd 2012 | Computer

Draytek Vigor 2850vn is one of the variants of draytek 2850n series. Additional features include support for both ADSL (also ADSL2+) and VDSL connectivity. The maximum speed limit that can be achieved through VDSL connectivity can be up to 50Mb/s. The 2850vn version includes adequate support for VLAN tagging, WI-FI, and Gigabit Ethernet etc. The secondary WAN interface helps in easy connection to other type of modems any time. The Vigor 2850n's secondary WAN interface can be connected to other modems now or later (e.g. a second ADSL or cable modem etc.). It also includes a USB port for advance 3G internet connectivity.

Have a look at the features of Draytek Vigor 2850vn routers:

Broadband ADSL/VDSL Router with 3G connectivity

Switchable Wi-Fi (Dual-Band) with speed limit in between 2.4 - 5.8Ghz

DSL Ports are totally compatible with VDSL and ADSL

3 WAN ports for cable modem, 3G, and ADSL/VDSL

Presence of highly flexible & secured V3 firewall

4 ports for gigabit Ethernet LAN connectivity

Wireless guest portal

Multiple private LAN subnet masking

Facility of user password access control

NAT sessions up to 50,000 on simultaneous basis

4 VLAN ports

Multicast IGMP v3

Efficient content filtering through help of matched data type or keywords

USB ports available for Printer connectivity

Security is one of the primary aspects of draytek vigor 2850vn routers. In fact, these are enriched with strong advanced level firewall (ver.3). Be it Ethernet, VPN, or wireless connectivity, presence of flexible firewall helps in providing a secured protection layer within the network. There is also filtering option available for web contents that allows restricting/blocking improper sites from opening within the network.
