The world of technology is changing life to be simpler day by day but making living complicated. Technology has provided us with more equipment for a sophisticated life. In case if there is any technical error in this equipment, it becomes a big headache for us to get it solved. You know, it is better to become a Computer technician. Nowadays there are many Computer Technicians with expert technicians to aid you at your time of need and difficulty with technology.

The demand for Computer Technicians is increasing every day. There are different types of computers and networks with an expert for each type. This can be like

• Desktop Support specialist

• Systems Administrator

• Help desk technician

• Internet Professional

• Computer Forensics Specialist

• Network administrator

• Customer support analyst.

A wide range of opportunities are available for these experts anywhere in the world. All they do is Answer the call and try to understand the problem just before they go on site. There are some problems which could be fixed easily just as the customer says it in the call. If in case the experts drop in at customer's location, they start asking questions regarding installation, power outage, etc.

These experts try to pinpoint the problem just with answers that we say. Then they start to inspect the equipment physically for any sort of damage like cracks. They ask us for any data or programs that need a back up. They start with the simplest solution like "Is it plugged in?" or "Is it turned on?" They start to check out for the motherboard for possibilities of a dead motherboard?

Once when they fix the problem, they reboot the computer just for the reason that the problem shouldn't occur again. They also check if the repairing work didn't affect any other component.

This usually happens like it happened with my dad too. When we called for the technician to get our speakers fixed, he fixed the speakers while something went wrong with the connection of headphones.

When everything is fixed, they test for some commonly used apps, to make sure if everything is fine like opening a webpage or playing a video or game. The technicians update the computers with Antivirus and anti-spyware. They try to show the customer that the problem is fixed and get paid for their work. Before leaving they also ask if anything else is required to make sure that the customer is satisfied.

Technicians do remember to impress their customer. It is for the reason that the customer would refer them to their friends and relations for their good service. They provide the customers with

business cards that make it easy for referring. A good computer technician has a very good knowledge about computers that they keep updating with the advancement in technology. He gains experience solving problems of various kinds over years. He starts his career with a formal computer training where he obtains a certificate. The best qualities of these technicians are their patience and positive attitude.
