How to REALLY Remove Security Shield Virus?

by Evan Nasseri

Article published on February 25th 2012 | Computer

It only takes 3 SIMPLE STEPS to remove Security Shield Virus!

Step 1: Get your free download of Perfect Uninstaller.

Step 2: Click on the Security Shield you wish to uninstall which is clearly listed on the screen.

Step 3: Click uninstall to open the wizard and follow the instructions to complete the un-installation process.

Run Perfect Uninstaller Immediately and Start Your Way to Uninstall Software!

Perfect Uninstaller provides three uninstall modes to make sure you can completely uninstall any unwanted programs. Following is a quick rundown of the three modes:

Uninstall â€“ This is the first thing you would try if you want to do a typical uninstall of any application listed in the application window. It will begin using the original applicationâ€™s uninstall program. Then Perfect Uninstaller will scan your Windows registry and delete the application from all entries and lastly, it will scan your computerâ€™s hard drives for any leftover files

Force Uninstall â€“ For some stubborn programs that the normal uninstall mode failed to uninstall, Perfect Uninstaller provides another solution â€“ Force Uninstall. It uses brute force to delete the application once and for all. To use this function you need to know exactly the installation directory of the program you wish to remove.

Special Uninstall â€“ Perfect Uninstaller provides you with a list of applications that are considered â€œspecialâ€• to uninstall. Perfect Uninstaller includes a special uninstall process for each of these applications. This list is independent of whether or not the application is installed on you system. If you have a specific application thatâ€™s not listed in Special Uninstall, all you have to do is easily fill out the form with your information and you will receive a response within 2 business days.

In todayâ€™s age of mass software, shareware and freeware, itâ€™s easy to get a lot of programs installe on your system but the opposite is not true at times. Even experienced users (techie people) find it almost impossible to completely remove every single file of any program without any software help. In fact, itâ€™s a given that PC technicians use a third-party uninstaller to remove unwanted programs.

Why do you need a Third-Party utility when uninstalling unneeded programs?

Some software vendors didnâ€™t ship an uninstaller with their applications.

Windows Add or Remove Programs usually canâ€™t completely remove a program from your system and leave some traces ranging from program folders to registry keys.

The press to release new software versions makes the authors ignore or pay little attention on un-installation.

Some programs integrate third-party components with no attention of their un-installation.

After un-installation of the main program some bundled add-ons are intentionally left on your

computer. Of course, not all third-party uninstaller utilities are created equal.

Perfect Uninstaller is a recognized, award-winning, advanced uninstall tool. Perfect Uninstaller has been developed to specifically uninstall any unwanted programs on your PC and makes uninstalling programs the easiest it can be. It completely solves problems you encounter when uninstalling programs with the following key benefits:

Easily uninstall applications that are not listed in Windows Add/Remove Programs.

Clear registry entries and drivers that applications typically leave on your computer after using Windows Add/Remove Programs.

Scan the registry and the drives for leftover files after running the original uninstall program to make sure a safe and clean uninstall.

Uninstall applications even when their original uninstall programs are corrupted or missing.

Forcibly remove unwanted programs by inputting their names or installation directories.

Provide special uninstall process for each of the most commonly used applications that are difficult to remove.

Completely remove Adobe Reader, McAfee, AOL Toolbar, AVG Anti-Virus, Norton 2006/2007 and much more difficult for a standard PC user to uninstall.

Besides the key features, Perfect Uninstaller offers EXTRA features that go beyond just uninstalling programs.

Restore programs that are deleted by mistake. In case that applications are deleted by mistake, Perfect Uninstaller backups resent 10 uninstall records to let you restore the registry. By both retrieving the uninstalled program from recycle bin and restoring the registry, the program can be easily recovered.

Restore system settings to an earlier date. Some programs can alter the system settings covertly without the userâ€™s knowledge after installation. Once they have been uninstalled, it may trigger system instability and PC errors. This feature simply returns your system to the way it was before using 6 options.

Provide three styles to view the programs installed on your system. You can easily switch between Details View, Icons View and List View. Sometimes when you use the Windows Add/Remove Programs, itâ€™s hard to find the right program you are willing to remove.

Provide detailed installation information of a certain program. Once the program is identified, Perfect Uninstaller will provide you specific information to the program, if available. This feature will help you better tell what a program is before you uninstall it.

Ease of use and user friendly interface. Perfect Uninstaller lets you uninstall programs with only a few clicks of your mouse.
