Are you targeting for new Lenovo machine to accentuate home computing with uncompromised entertainment, instant connectivity, gorgeous but space-saving designing features? Then, go through this article to see what Lenovo IdeaCentre A Series desktop has to offer.

Design :

Have space problems but looking for a decent machine, then this PC is sure to hold you attraction. Tower desktop integrated with speaker, microphone, DVD player, and screen with built-in webcam is a perfect match for busy kitchen, kid's bedroom, studio, or other cramped quarters. The machine with the optional wall-mount kit and single-cord design is just the right solution, which you have been looking for.

Performance :

2nd generation Intel Core i7 processor with Intel Turbo Boost Technology is to make sure that there is no slowdown while you multitask.

Multimedia Power :

Dolby stereo sound with high-contrast LED display is the oomph factor, and you can't stop yourself from the soul streaming and hip shaking experience with the latest blockbusters.

Touch :

Wireless Bluetooth mouse, breakthrough touch technology and acoustic sound wave input are to enthrall your computing experience. Lenovo Rescue System is an automated setup to back up and restore your valuable files.

Going through the Lenovo Reviews by trusted organization, reveals that the product acquires maximum points in terms of design, touch and display features, and is not less than paradise if you are a gaming freak, as it has the fastest 3D chip among Windows-based all-in-ones. The model actually boasts more than just a stylized exterior. It is a companion which will not let you alone in case of system crash, because of its built-in Lenovo OneKey Rescue System. Just press the press F2 and retrieve corrupted files, reinstall drivers and applications and get the ultimate factory settings.

However, if you have encountered issues with your Lenovo IdeaCentre A Series desktop, then nothing to worry, as Lenovo Technical Support is just behind you. The portal is ready to cater support for a machine running on all Windows versions. Experts can help regarding wireless networking issues, audio issues, video display issues, power management issues, Windows issues, lock-ups, and hangs, driver, startup or booting issues and more over the phone or through remote-screen sharing.

You may also fix intermittent issues by following the support videos and knowledgebase available on the portal. Try to run the Lenovo machine in the Easy Setup by pressing the F1 key. Enter the password if it prompts for. Click the Loop test symbol to run the standard tests on all hardware. The results will be displayed as blue "OK" or red error codes. Run the PC Doctor diagnostics. PC Doctor for DOS is available by pressing the F11 key. Try by removing and resetting all hardware (power supply, battery, cables, adapters, memory, etc.). Remove unnecessary hardware devices for testing

purposes.

If the problem has started after configuring a particular hardware device then swap the suspect device with an identical, known good, device, if available. Verify that the latest BIOS for the system has been installed. Updating the Windows and the system security software can also check the issue. You should perform a system scan to detect and remove viruses, spyware and malware, in case you are getting security related errors. While troubleshooting the system don't ignore the user-manual.

When the problem is extremely complicated, and is beyond your scope, then contacting the Lenovo number is the last option. Be ready to furnish information regarding system make and model, software configuration and others while calling the vendor, as the information helps them to diagnose and fix issues in quick and easy manner.
