Article published on April 3rd 2012 | Computer

Gold is always a very important factor to MMORPGs. The more gold you have in your pocket, the better equipment will belong to you. Advance game skills sometimes is not enough for running into dangerous dungion and kick some monsters ass. In Tera, as with most other medieval fantasy style games, there is no exception too. And while it may not win you the game, gold can get you the best equipment and give you quite the edge when you take the field of battle. With good armor suit, you will be able to beat an enemy that much more powerful than you, can enter the forbidden dungion that you will not even dare to give a quick glance at it when wearing cotton armor and holding wooden sword in your hand. If you want to get Tera online gold quickl and you simply can't wait to get it the old fashioned ordinary way from many reasons like lacking of time, then you might have to go to the Tera gold store

While it might not be something you find in the Tera gold guide, you can get cheap Tera gold if you find a Tera gold store. The store is a place where you can pay a company real world money, sometimes as little as $10, to get a large amount of the in game gold that you can purchase weapons and equipment with. And if you catch a company while there is cheap TERA gold on sale, perhaps a special offer, then you can get more gold with less real money. It's a textbook example that puts most other ideas in the Tera gold guide to shame.

Now, another way that you can earn cheap Tera gold is to participate in some Player Versus Player action. This required you to have a character of over 10th level, and you can do things like challenge other players for a given amount of gold. It's sort of like a trash talking street fight, and the winner takes the purse of gold once the fight is over and the parameters are met. If you're a talented player, have the best equipment and you really know how to use your abilities, then you can take on as many as 5 opponents as a way to bring in some very fast case on your Tera account. Of course, after a while, people might stop fighting you if you keep winning.

And of course there's the old fashioned way of earning gold in Tera: questing for it. This means that you have to go out, find monsters, locate quests and then fulfill all of the fine print. If you're a strong character with the proper resources, or if you have comrades that you can take with you, then all you need to do is locate quests that have large, monetary pay outs. Once you know which monsters have the money, you'll be good to go when it comes to Tera gold and keeping your coffers nice and full.
