# Advantages of a Montessori Pre-school Program by Phineasrodney

Article published on January 13th 2012 | Education

It is difficult for parents to decide what type of pre-school in Port Jefferson, NY is best for their children. This is not a decision you should make immediately but consider their childhood education in terms of their educational future. Compare the traditional pre-school activities in Port Jefferson, NY with those your child will receive by attending a Montessori pre-school program.

## Well-rounded Education

As a parent the first thing you want to look at is the quality of education your children will receive when attending pre-school in Port Jefferson, NY. If you're only looking for someone to care for your child while you are working or attending school, you are not likely to see the benefits of a Montessori education. However, for those who are seeking a well-rounded education for their children, the Montessori program is just the place to begin.

Children have yet to experience the trials and tribulations that come with adult life, so their view of the world at this point is rather open-ended. The Montessori pre-school activities will allow those children to develop their self-esteem while building their self-confidence. They learn better during the early stages of their physical and intellectual development thus helping them maximize their future learning potential and setting the stage for a successful educational future.

## Program Mission

When it comes to childhood education in Port Jefferson, NY the Montessori method of teaches provides what children need and is designed to cater to the needs of those children. The program goes beyond simple play or complex educational requirements and instead helping students delve into their individual curiosities and engage in learning activities based on the child's individual aspirations. Children have the opportunity to develop their unique potential. They are able to develop an understanding of the world and everything in it during a time in their lives when their minds are still open to learning new things.

## Curriculum Guidelines

The Montessori program begins with pre-school children and continues through Kindergarten. The children are able to get an early start on skills they will need to have as they enter 1st grade and continue through college and even beyond. The program uses interactive methods of teaching that are easier for young childrenâ€”structured games and play along with outdoor activities that enhance the learning experience. Children are exposed to many different topics including art, music and even foreign language. While they may be young in the minds of many, experts believe this is the best time for children to learn a second language. Their minds are still open enough to learn quickly, and they are not deep-rooted into the idea of only speaking or understanding one language.

## Multi-faceted Program

Unlike most pre-school programs in Port Jefferson, NY the Montessori program is multi-faceted. There is not one individual program that is right for every child; the children have the opportunity to engage in self-directed activities that enhance their own curiosities instead of following what everyone else is doing. Children learn at different speeds and have interest in different things, so it's important for pre-school activities to enhance those individual skills and curiosities.
